Its Foundations Have Settled and the Building Leans Over.

Officials Fear No Immediate Danger and Will Cause Its Repair.

Visions of another Park place horror flashed across people's minds this morning when they passed the building numbered 257 Broadway. The cause was the settling of the foundation on the southern sice, giving the structure a decided "list to port " of at

least five inches.

The reason of the settling is well known, and the result will undoubtedly involve a very interesting litigation in the courts. The Home Life Insurance Company is

The surgeon found an excited crowd in the troom. The unfortunate man who had, it was supposed, locked bis teeth up in his stomach was lying on the bed groaning.

"Why in thunder didn't you take 'em out when you lay down?"

Another man was going around the floor on his bands and knees, peering under the bed and the washstand and turning up the edges of the carpet. This man was also saying something. It sounded like this:

"The dnump probably dropped 'em. It's a case like that of the old woman who was looking for her spectacles and found them on her ness."

"Hurry up, Doc," said the bell boy, who expected to see a surgical operation performed and and was anxious to have it begin.

"Guess you'll have to cut 'in open,' he added, with a cheerfulness that was not saired by the man on the bed, who groaned twice as hard when he heard what the bell-boy said.

"Was the plate a gold one?" asked a pawnbroker's cierk who was present, and who evidently wanted to ascertain if the game of cutting the man open was worth the candle.

Commissioner of Buildings Brady courte-ously gave the reporter access to the records, and stated that the building is not essentially unsafe, and has not, therefore, been con-demned, but it must be restored to its or ignal condition, it not by the owners then by the

city.

The damaged building, at the top, juts over the Home Life property about two inches. This will, of course, interfere with the walls of the new building. It is understood that the Home Life people, or rather the contractor, will lop off the offending portion of the bank building, although they caused the obstruction by their own act. This would be opposed by Commissioner Brady.

"Is it possible, Mr. Brady, for this massive thre-proof building to be restored to its original position."
